FOR IMMEDIATE RELEASE

Aqua Diagnostic appoints Greg Roberts as Business Development Manager

Melbourne – 2 July 2007: Aqua Diagnostic Pty. Ltd. today announced it has appointed Greg Roberts as Business Development Manager.

Part of Aqua Diagnostic's management team, Greg will focus on building and managing an effective distribution network throughout the Asia Pacific region for the distribution of the Aqua Diagnostic products.

According to Aqua Diagnostic CEO Dr Roger Knight, Greg's proven record in establishing and managing high performing distribution networks in Asia makes him an ideal appointment to drive the company's sales growth.

"We required a Business Development Manager with proven experience in international business development with scientific instrumentation," said Dr Knight. "Greg's expertise in dealing with the expected demands of rapid sales growth developed over many years in the industry, make him an ideal person to lead Aqua's business development activities."

"It is a rare to have the opportunity to participate in a truly innovative leapfrog technology," says Greg. "The PeCOD™ COD Analyser offers real benefits that will undoubtedly be reflected in the rate of market uptake. No current technology can provide consistent results as simply and efficiently."

Before joining Aqua Diagnostic, Greg worked in the scientific industry for over 15 years, marketing and selling equipment across Asia covering a broad spectrum from high end Infrared Spectroscopy instrumentation containing focal plane array detectors through to chromatography consumables. He holds a Bachelor of Science in Chemistry from Victoria University of Technology.

About Aqua Diagnostic

Aqua Diagnostic is the first company in the world to use a nanotechnology based photo-electrochemical technology (PeCOD™) for analysis of chemical oxygen demand (COD). Established in 2005 with the financial backing of SciVentures Investments, Aqua Diagnostic is currently commercialising a range of products utilising the PeCOD™ technology to enable COD analysis in the field, laboratory and on-line. This development has been undertaken with the assistance of the Federal Government's Commercial Ready program.
